# ■ ONT Holder

Mofe

The majority of failures in FTTh infrastructure are caused by fiber cables inside flats.

This is because the unprotected fiber optic cable or connector is damaged by factors such as:
-Cleaning
-Pets
-Children

Agredit has developed the CTBox as a solution. CTBox, which enables termination with fusion splice or quick connector, minimizes failures by protecting both the cable reserve and the connector. It also allows ONT to be fixed on the wall independently of the user's home decoration.

Technical Details

Spesifics	Material	ABS
	Termination	Fast Connector or Fusion Splice
Dimensions	Width	85 mm
	Height	200 mm
	Depth	41 mm

You can easly terminate fiber optic indoor with it. Also you can easly fix monoport mini ONT devices with spring Mechanism.

60 mm to 95 mm
Spring Mechanism
